Bad Logs, Bad Breasts. - Old Wounds, Sores and Ulcers.

It is surprising how quickly a sore, ulcer, or wound, deprives the body of strength, and unfits it for the duties of life; but it is no less wonderful to watch the effect of Holloway's Healing Ointment, when it is used according to the printed directions, and assisted by appropriate doses of the Pills. The pain, inflammation, and other morbid unantestations, soon disappear from the affected part and health and strength return—This treatment creates sound flesh, and therefore makes its cures complete.

Will be cured with the greatest certainty if large quantities of the United the Worked into the complaining parts. This treatment must be perseveringly followed for some time and duly assisted by powerful doses of Holloway's Pills. The essence of these diseases lies in the blood, which has floating through each vessel the pain giving poison which vitates and inflames every tissue teomes in contact with and produces the hot, swillen, clustic enlargement about the joints so characteristic of gouty and rheumane maladies.

pointing out the diagnostic of a disease, is incapable of applying a remedy, and he is an equally useless reformer who stops short in respective extravagant Governments might be carried on with some degree of economy consistent with an efficient public service.

A few weeks ago we pointed out the necessity of adopting, throughout both colonies the municipal system of government. We maintained that wherever a community reach ed a certain number of a population it should come within the folds of municipal rule. At the very outstart we should save by this system, in both colonies, all the heavy expenses attending stipendiary magistrates, and fully one half the outlay entailed in the management of the police. This, however, would be but a small fraction of the benefit. What are now neglected and helpless districts, left dur ing the wet portions of the year in a kind of roadless isolation, would, through the vigor engendered by self-government, speedily become thriving communities, and lose their insularity in the connecting links of compagination. Instead of useless Road Commissioners, with a still more useless land office we should have in every agricultural distric a Road Board, elected by the farmers. This Board would have the power to assess the property in its district for the repair and construction of public roads, and would, in addition to its own local revenue, receive yearly grants from the general Government. Instead of the ponderous office of Surveyor General we might have a practical surveyor to main tain a general superintendence of the roads of the colony, and give the public every information with regard to the public lands. Here we should have at once a heavy weight of responsibility removed from the shoulders of the general Government, and a much mor efficient management of public works for it is very evident if the road-making i left to those who are most interested in the process-the agricultural settlers-we shall have the means of communication with the interior constructed and kept in the very best possible state-and this at a figure very much lower than could by any possibility b performed by the Executive. With Victoria, Nanaimo, and Esquimalt under cheap municipal institutions suited to their respective con ditions, almost the whole work of governmen would be taken out of the present expensive hands; so much so, indeed, that if we remained separate, the Admiral or chief naval officer of the station, could, with little addition to his present duties, represent Her Majesty and administer the Government. Instead of the pompous office of Colonial Secretary with its staff of clerks, the requirement of the public service would be amply supplied by an intelligent clerk to the officer administering the Government. Instead of th high-sounding Attorney General we might have a smart lawyer who would unite with his office of Law Adviser that of Registrar of Deeds. The Treasurer is a name suitable enough, but we would combine his office with that of Assessor, and give to him and the Colonial Surveyor a clerk between them. A Chief Justice the colony has already provided for. The Post office and Harbor Master' office we cannot well change for the better nor can we get a man like our present Sheriff to do the same amount of work for less movey Now to the expenses. Twelve hundred pound a year would pay the officer representing her Majesty; £1200 for the Chief Justice; £600 for the law adviser; £400 for the Governor's clerk (the office of Colonial Secretary); £400 for the Treasurer; and £400 for the Colonial Surveyor. The total official expenses, including Post office, Sheriff's office, and clerica assistance, would reach but little over £5500 or about the amount required by the Home Government for our civil list. The city o Victoria would take the police in hand, and as we have said before all magisterial expenses from the general Government would cease. The amount of taxation required for carrying on such a Government would not reach over \$70,000 or \$89,000 at the outside, instead of our present \$210,000, and with this \$70,000 or \$80,000 we could spare largely for road-constructing, education and mail conveyance. When we say taxation we do not accept the economic doctrines of Mr. W. A. G. Young, or that other luminary in New

Westminster who has found out that " miners'

licenses, mining receipts, spirit and trading licenses, port and harbor dues and road tolls

do not properly come under the head of general taxation;" but include within the terms

those contributions to the general Govern-

ment classified by ignoramuses like Adam Smith, Bentham and Mill as general taxa-

tion. The very items which Mr. Young and

his addle-headed confrere in political eco-nomy the editor of the Columbian, repudiate

as taxes, on the ground that the person pay-

ing receives a quid pro quo, are put down

by the great writers on political matters as the nost mischievous description of all taxation -we mean the law taxes or fees of cour Those who are under the necessity of going to law," says Bentham, " are those who ben efit least, not most, by the law and its admin istration. To them the protection which the law affords has not been complete, since they have been obliged to resort to a court of justice to ascertain their rights, or maintain those rights against infringement; while the remainder of the public have enjoyed the immunity from injury conferred by the law and the tribunals without the inconvenience of an appeal to them." For the further information Saturday, Sept'r 23d. of these novices in political economy we shall conclude with a sentence from Mill. "If the Government takes from the contributor five pounds a year, whether in one way or another exactly that amount must be retrenched from his consumption to leave him as well off as before; and in either way the same amount of sacrifice, neither more nor less, is imposed upon him."

If we pull down we must show the capacity to build up. If we raze our present extravagant political system to the ground we must at least try and replace it with a better. Having shown, we think, not only the utter inutility of our cumbrous form of Government, but the rainous character of its demands, we shall proceed to draw out what we conceive to be a system more suited to our condition. In doing so we shall take Vancouver Island and British Columbia se parately as well as unitedly, not so much in the present instance to prove conclusively the advantages of union, as to show how their

HARD STORIES ABOUT TREATMENT OF PASsengers-We notice that a number of passengers from San Francisco, via Panama to New York, are out in a card denouncing the treatment of passengers by the Atlantic Mail Steamship Company, between Panama and New York, as "infamous, a burning shame, and a national disgrace." They say : " Arrived off Panama at anchorage on the 21st of July, at 6, a. m., where we were transferred to a small steamer, that to the eye did not seem capable of holding more than two hundred persons, but by packing they man-aged to get some eight hundred to one thou-sand, including children, on board, when, after a delay of two hours in this position, with after a delay of two hours in this position, with the thermometer at finety degrees, we were transferred to the train in waiting at Panama, when a general rush was made for the cars. Mr. Jackson read the notice calling the meeting, and also the report of the last meeting as published in the Colonsar of the 13th which he said was very accurate.

Mr. Young, after conferring with Mr. Jackson said that if he was required to give up the security he held from the bankrupt on accepting the composition of thirty cents, he should certainly decline, and as he represented claims of over \$3,000, and Messrs. Janion, Green & Rhodes he found claimed as much as \$2,30¢, which would alone amount to more than the proportion required to negative the proposition, it was needless to proceed any further with the meeting.

Mr. Copland was proceeding to explain that the previous meeting amounted to no-

Mr. Copland said the offer itself had not ve been put to the meeting, and the resolutions for carrying it out were therefore premature. Mr. Jackson said the resolutions embodied the terms of the offer; if a sufficient number of creditors did not acquiesce in them they

THE GERMAN SHOOTING FESTIVAL.—A ming the prizes contended for at the recent rifle tournament in Germany, we notice the following from California in addition to the silver bar: Album of views of California, the Vocemitic, etc., presented by A. Thiele, of the Faust cellar, corner of Clay and Montgomery streets, value, 840; a "sign" or \$50 and stars. After the call, the Admiral set down with Gen. Grant and enjoyed a gar. It is interesting to hear the comments. There is a large, stout, white haired man, dressed in Cauada grey, accompanied by his wife and daughter on a trip.

"I intended to spend another day in Quobec," said he, "but when I found Gen. Grant was going up river I thought I would go in the same boat. My wife feels bad not to see Montmorenoi, but then she can see Gen. Grant."

"How does he impress you?" I asked.

"Oh, he is a gentleman. He is a plain man, and the more I see of him the better I like him. He isn't stuck up at all, but wears his honors quietly," was the reply.

On the sola opposite to me is a young snob dressed in a short grey roundabout. He is quizzing the General through his sye-glass.

"Aw, I don't see anything remarkable about him," he says to a fellow of the same breed who sits beside him.

If the subject of their remarks was exceedingly dignified and wore full military dress, with epaulets, gold lace and gilt buttons—if he looked haughtily upon everybody present—if he was proud enough not to see aryone who was not presented with formality and dignity—doubtless those fellows would see something remarkable in him. They have not sense enough to know that his unostentatious manners, his urbane treatment of all who approach him, is so very remarkable that the people recognize it at once.

I stood upon the guard when the boat left policeman arrested frim and took firm away to avoid a row which was threatening to break out every moment. Night came on, and we were just congratulating ourself on the cessation of hostilities and the prospect of a quiet night, when we heard the old singsong beliowing in the street once more, looked out and saw with a facility bodding bodding. song beliowing in the street once more, looked out and saw, with a feeling bordering on despair, a man with a seedy coat, shocking bad hat, and a bundle of papers "honly one bit heach," holding forth on the doctrine of the total burning up and annihilation of the wicked—served 'em right, too. Alas! for the brevity of earthly dreams of peace! the Crisis had come again.

The question at issue I conceive to be simply this: What are our taxes as compared with other colonies? The answer is obtained by ascertaining the expenses of the Government and the civilized population of the colony; then by a very simple rule of Arithmetic called Division, we arrive at the pro rate expense of the population which is called in other countries the taxes of the people. HOLLOWAY'S PILLS—Liver Complaints.—The virtse of these incomparable Pills are fully appreciated in every part of the eivilized world. As they set on the general system through the circulation, there are few diseases which they cannot cure; but they are especially efficacious in all the disorders of the liver. For those they are an indubitable specific. They possess unrivalled potency for good, while they cannot de harm. A child might physic itself with these Pills, and without the slightest danger, except from such excess as would make the most wholesome ailment in the world an evil. By reducing the superfluous bile, regulating its due secreton, and giving the properties of the stometh, they effect a permanent and perfect cure.

and perfect cure.

Holloway's O'NTMENT AND PILLS—Palpitation, Shortness of Breath, Dropsy.—This last named disease is often preceded by irregular action of the heart, and difficult respiration which symptoms are always severe, and ever go from bad to worse, unless proper means of cure be resorted to. In Holloway's unrivalled Ointment and Pills' the dropsical patient will ever find succour; the present relief derived from the use of these remedies is marvellously quick and perseverance in the steady application of his noble Ointment invariably results in a lasting and satisfactory cure. The two medicines act with such energy on the circulation and absorbent system, that the dropsical fluid vanishes, and the sufferer finds all the oppressive symptoms daily decline, till natural health returns. Trade with the interior is getting pretty brisk, and if the project should be completed of digging the canal, mentioned in my last, Manzanillo will and must become one of the natural health returns.

HOLLOWAY'S OINTMENT AND PILLS.—The family medical chest that is furnished with there powerful remodies needs nothing more. Indigestion, general dibility, liver complaint, eruptions, sores, wounds, ulcers, tumours, &c. are infalibly cured by their use. They purify the blood and give tone and vigour to the whole system. The Ointment, when well rubbed into the parts affected, enters the flesh just as salt enters meat, and if the Pills be taken as an auxiliary, the cure is speedy, thorough, and permanent. These medicaments are composed of rare balsams, without the admixture of a grain of mercury or any injurious substance. They are peculiarly mild and gentle in their action, and are as safe as they are efficacious. A correspondent writing on board the steamer which conveyed Gen. Grant from Quebec to Montreal, is responsible for the following incidents:

When tourists at Quebec learned that Gen.

the same boats over the same ground was to take place on the 17th, when the Annia would, it was thought with a lighter wind, stand a better chance.

A BIG Shark—A large ground shark was caught in a fisherman's net. It was purchased by Captain Robinson, Curiosity dealer, Washington Street, for exhibition.

[From the Alta.]

Chowed before we were out of the Woods—The weather showed symptoms of a change for the better a week since, and we began to think that summer was over, and the winds and dust clouds laid for the season, but we were "in advance of the times."

Winson's Cheus.—The Zampilacerotation as performed by the Buislay Family, after Leotard, surpasses in daring and agility any act of similar character ever presented to a California public. On Saturday night four trapezes were read. There is no gainsaying the assertion that the Buislay Family are the best gymnasts and aerobats who have visited us.

The German Shoothed Festival.—Among a transport of the stream of the strength of the same boats who have visited us.

greatly augments the purifying and salutary influence of the Pills.

Holloways Pills.—General debility, low spirits, and nervous irritation, are the consequences of dyspepsia or indigestion. The Pills soon give tone to the stomach, renovate the digestive powers, purify the blood, and give strength to the whole system. Sluggishness of the body and depression of the mind are steeceded by a cheerful activity of the physical and mental functions. Indigestion is the parent of so many evils, and is zo common, so universal a complaint, that it is a great biessing that such a remedy as this invaluable medicine should have been discovered. No one need long suffer from indigestion with these Pills at hand.

The departure of her stalwart sons from a country so thinly populated is naturally regarded as a great calamity. But though this expatriation of her people had been going on for some time, it was not until 1849 that it had assumed such proportions as to excite alarm, and yet since that time it has been steadily on the increase, having in 1853 reached 6050 per-time resonant the Southern rebels have got by the cars Bennett Young, the raider, has quarrelled with Sanders' Italian son-in-law, Dr. Coutri. with Sanders' Italian son-in-law, Dr. Coutri Coutri was a surgeon in the Yankee army and while in charge of some ambulance containing Federal wounded, he drove then into the Confederate lines, when the beauti-ful Miss: Sanders was so clated at the Don

Holloway's Ointment and Pills—Acute Rheumatism. In all severe pains in the joints and muscles, after due fomentation with hot water, the soothing action of this Ointment is most remarkable; it seems at once to lessen inflammation, ease pain, reduce the swelling, restore the free circulation, and expel the disease. In these complaints, indeed, Holloway's Ointment and Pills are an infallible specific. The Ointment should be rubbed as near the part in pain as the patient can bear; it is absorbed, and directly conveyed to the diseased textures, when, acting on nerve, vessels, and guiders, it will arrest disease and parifying qualities of the Pills have the happiest effect in assisting the Ointment.
